OFFER**

for
**Houghton
Mifflin
Text Users**

For more than 4 billion years, geologic forces have shaped the Earth. This lengthy history is daunting to many students. Mountain Press Publishing Company's **Roadside Geology** and **Geology Underfoot**

series' demystify the Earth's geology by placing students in the field where their senses can touch, feel, and smell the abstract.

Written by professional geologists, the **Roadside Geology** and **Geology Underfoot** series bring students closer to the stories told by rocks and landforms. Each book in the **Roadside Geology** series covers the geology of an entire state, beginning with a regional

overview followed by road guides for specific highways—ideal for taking geologic roadtrips. The **Geology Underfoot** series takes students one step further, focusing on specific sites of geologic interest in a region. Both series are full of graphics, charts, maps, and photographs.

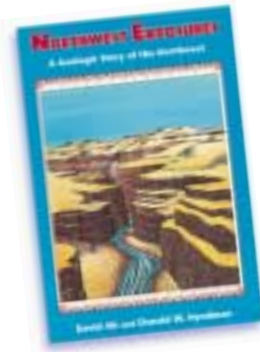

*Exploring local geologic features gives students a chance to connect the abstract with the world at large. The **Roadside Geology** and **Geology Underfoot** books are tools for geologic exploration that invite students to roam beyond the classroom.*

TOOLS FOR THE REAL WORLD

“Perfect road-trip companions!”

—Orion Afield

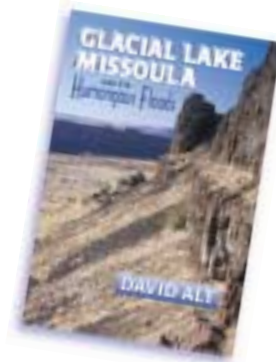

Northwest Exposures
A Geologic Story of the Northwest
David Alt and Donald W. Hyndman

“Northwest Exposures describes the geologic history of the northwestern US from the Rockies and Northern High Plains to the Pacific Ocean, and from northern California to Washington, with even a few references to conditions north of the border. . . . It would be useful to the geologist and the non-geologist alike.”

—Volcano Quarterly

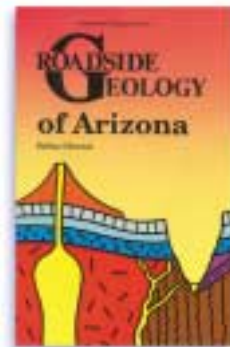

456 pages • paper \$24.00
ISBN 0-87842-323-0
Item No. HM 222

Glacial Lake Missoula and Its Humongous Floods
David Alt

Follow the path of colossal Ice Age floods that reshaped the Northwest as they raged from western Montana across the Idaho Panhandle, then scoured eastern Washington and rushed down the Columbia Gorge to the Pacific Ocean.

From *Roadside Geology of Northern and Central California* by David Alt and Donald W. Hyndman

“ . . . a marvelous concept, a whole series of books on geology in various states across this country based on a road-by-road study of the structure of the Earth as revealed from a car window.”

—Adirondack Magazine

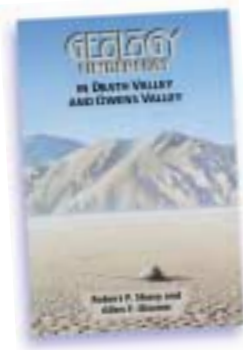

“Each book begins with a comprehensive mini-course in geology, taking the reader from the plate tectonics theory all the way to recent Tertiary sedimentation and glaciation.”

—Rock & Gem

Geology Underfoot in Southern California
