

Section 8.5 The Binomial Theorem

Objective: In this lesson you learned how to use the Binomial Theorem and Pascal's Triangle to calculate binomial coefficients and write binomial expansions.

Course Number

Instructor

Date

Important Vocabulary

Define each term or concept.

Binomial coefficients

Pascal's Triangle

I. Binomial Coefficients (Pages 619–620)

List four general observations about the expansion of $(x + y)^n$ for various values of n .

1)

2)

3)

4)

The **Binomial Theorem** states that in the expansion of $(x + y)^n = x^n + nx^{n-1}y + \dots + {}_nC_r x^{n-r}y^r + \dots + nxy^{n-1} + y^n$, the coefficient of $x^{n-r}y^r$ is _____.

Example 1: Find the binomial coefficient ${}_{12}C_5$.

What you should learn

How to use the Binomial Theorem to calculate binomial coefficients

II. Binomial Expansions (Pages 621–622)

Writing out the coefficients for a binomial that is raised to a power is called _____.

What you should learn

How to use binomial coefficients to write binomial expansions

Example 2: Write the expansion of the expression $(x + 2)^5$.

III. Pascal's Triangle (Page 623)

Construct rows 0 through 6 of Pascal's Triangle.

What you should learn

How to use Pascal's Triangle to calculate binomial coefficients
