

Index

- Abner, Little, L4
 Alexandria lighthouse, R6
 Algorithm, simplex, L1
 Anderson, Helge, M15
 Antisnowflake, C6
 Applications of trigonometric ratios,
 R6, R10
 Attractors, finding, C2
- Boole, George, S1
 Butterfly effect, C1
- Capacity, M5
 metric units, M9
 Celsius temperature, M6
 Celsius-Fahrenheit conversion formulas,
 M7
 Centimeters, M2
 Chaos, C1, C3, C5
 Closed switch, S1
 Complementary switch, S1
 Computer gates, S5
 Conditions, positivity, L2
 Constraint, L2
 Constructing networks, S2
 Converting metric units, M2
 Convex polygon, L3
 Cosine, R1
 Crichton, Michael, C1
 Cubit, M1
 Curve, fractal, C1
- Dames Point Bridge, R11
 Dantzig, George, L1
 Decimal system, M1
 Designing toys, S3
 Diagrams, logic, S5
 Distance, metric units, M4
 Ducks and geese, L4
- Equivalent switch, S2
- Fahrenheit temperature, M6
 Fast *Food Guide*, L1
 Feasible region, L2
- Finding
 attractors, C2
 hypotenuse, R4
 sides, R4
 Foot, M1
 Formulas, Celsius-Fahrenheit conversion,
 M7
 Fractal
 curve, C1
 geometry, C3, C5
 Fritschner, Sarah, L1
- Gates, computer, S5
 Geometry, fractal, C3, C5
 Gram, M2, M5
 to ounces, M12
- Humerus, M10
 Hypotenuse, finding, R4
- ICBM, S4
 Inch, M2
 Inclination, ramp, R7
 International System of Units, M1
 Inverse trigonometric keys, R7
- Jacobson, Michael, L1
 Jurassic Park, C1
 Jurassic Park fractal, C6
- Kilogram, M1, M2
 Kilometers, M2
 Kishazy, Rudy, M15
 Koch, Helga Von, C3
 Koch snowflake, C3
- Laptops and desktops, L5
 Length, M2
 of lines, C3
 metric units, M8
 Linear, M2
 Linear equation
 maximum, L3
 minimum, L3
- Linear programming problem, L1
 Lines, length of, C3
 Liter, M1, M2
 Liters and gallons, M13
 Little Abner, L4
 Logic
 diagrams, S5
 statements, S5
- Macolm, Ian, C1
 Mandelbrot, Benoit, C3
 Mass, M5
 Mathewman, Gwen, M15
 Maximize profits, L2
 Maximum of linear equation, L3
 Meter, M1, M2
 Metric system, M1
 Metric units, M2, M8
 capacity, M9
 converting, M2
 distance, M4
 length, M8
 volume, M9
 weight, M6, M9
 Mile, M1
 Miles per hours to kilometers per
 hour, M13
 Millimeters, M2
 Minimum of linear equation, L3
- Network(s)
 switching, S1, S2, S3
 constructing, S2
- Open switch, S1
 Ounce, M2
- Parallel switch, S1
 Pitiscus, Bartholomeo, R1
 Polygon, convex, L3
 Positivity conditions, L2
 Pound, M2
 Problem solving, M11, S2
 Problems, linear programming, L1
 Profits, maximize, L2
 Pythagorean Theorem, R9

Quarts, M2
to liters, M13

Ramp inclination, R7
Ratios, trigonometric, R2
Region, feasible, L2
Right triangle, R1

Second, M2
Series switch, S1
Shannon, Claude, S1
Sides, finding, R4
Sierpinski's triangle, C4
Simplex algorithm, L1
Sine, R1
Snowflake, Koch, C3
SOHCAHTOA, R2, R11
Solving triangles, R2, R8
Statements, logic, S5

Switch
closed, S1
complementary, S1
equivalent, S2
open, S1
parallel, S1
series, S1
Switching networks, S1, S2, S3
System
decimal, M1
metric, M1

Tangent, R1
Temperature, M6
Terminals, S1
Thales of Miletus, R1
Toys, designing, S3
Triangle(s)
right, R1
Sierpinski's, C4
solving, R2, R8

Trigonometric ratios, R2
applications, R6, R10
Trigonometry, R1

U.S.-Metric
conversions, M11, M14
equivalents, M10
relations, M2
Units, metric, M8

Vertex, L3
Volume, M5
metric units, M9

Washington Monument, R10
Weight, M5
metric units, M6, M9

Yards to meters, M12
