

# Graphing Calculator Instruction Guide

for

## *Calculus Concepts: An Informal Approach to the Mathematics of Change*

### CONTENTS

	PAGES
<b>Part A</b> Texas Instruments TI-82 Graphics Calculator Texas Instruments TI-83 Graphics Calculator	A-1 to A-107
<b>Part B</b> Texas Instruments TI-85 Advanced Scientific Calculator Texas Instruments TI-86 Graphing Calculator	B-1 to B-107

*Detailed contents begin on page v.*

### HOW TO USE THIS GUIDE

Use the following table to locate the part of this *Guide* in which your calculator model is discussed:

<u>Part</u>	<u>Calculator Model</u>
A	Texas Instruments TI-82 and Texas Instruments TI-83
B	Texas Instruments TI-85 and Texas Instruments TI-86

The section references in the following detailed table of contents should be read as follows:

Section  $x.y.z$  of this *Guide* refers to discussion in Chapter  $x$ , Section  $y$  of the *Calculus Concepts* text. The discussion is the  $z$ th topic in the *Guide* that refers to that particular chapter and section.

For example, the detailed contents indicate that there are 3 different sections in the *Guide* (1.2.1 through 1.2.3) pertaining to Section 1.2 of *Calculus Concepts*. The discussion in Section 1.2.2 of this *Guide* is the second technology discussion pertaining to Chapter 1, Section 1.2 of your text.

In Part A, all instruction is for both the TI-82 and TI-83 (or in part B, for the TI-85 and TI-86) unless it is marked for a particular calculator. When the common discussion resumes for both calculators, it is so indicated.

## DETAILED CONTENTS

	PART	
	A	B
<b>SETUP</b> .....	<b>Page</b>	
	A-1	B-1
<b>BASIC OPERATION</b>		
1. Calculating .....	A-2	B-2
2. Using the ANS Memory .....	A-2	B-2
3. Answer Display .....	A-3	B-3
4. Storing Values .....	A-3	B-3
5. Error Messages .....	A-3	B-3
<b>CHAPTER</b>		
<b>1 THE INGREDIENTS OF CHANGE: FUNCTIONS AND LINEAR MODELS</b>		
1.1.1 Entering an Equation in the Graphing List .....	A-4	B-4
1.1.2 Drawing a Graph .....	A-4	B-4
1.1.3 Manually Changing the View of a Graph .....	A-5	B-5
1.1.4 Automatically Changing the View of a Graph .....	A-5	B-6
1.1.5 Tracing .....	A-6	B-6
1.1.6 Estimating Outputs .....	A-7	B-6
1.1.7 Evaluating Outputs .....	A-8	B-7
1.2.1 Determining Outputs .....	A-9	B-9
1.2.2 Solving for Input Values .....	A-10	B-10
1.2.3 Graphically Finding Intercepts .....	A-14	B-12
1.3.1 Graphing Piecewise Continuous Functions .....	A-16	B-14
1.4.1 Entering Data .....	A-18	B-16
1.4.2 Editing Data .....	A-18	B-17
1.4.3 Deleting Old Data .....	A-19	B-17
1.4.4 Aligning Data .....	A-19	B-18
1.4.5 Plotting Data .....	A-19	B-18
1.4.6 Finding First Differences .....	A-21	B-20
1.4.7 Finding a Linear Model .....	A-22	B-21
1.4.8 Pasting a Model into the Function List .....	A-23	B-22
1.4.9 Graphing a Model .....	A-24	B-22
1.4.10 Predictions Using a Model .....	A-24	B-23
1.4.11 Copying Graphs to Paper .....	A-24	B-23
1.4.12 What is “Best Fit?” .....	A-25	B-24
1.4.13 Naming Data Lists on the TI-83, 85, 86 (optional) .....	A-26	B-25
<b>2 INGREDIENTS OF CHANGE: NON-LINEAR MODELS</b>		
2.1.1 Entering Evenly-Spaced Input Values .....	A-27	B-26
2.1.2 Finding Percentage Change .....	A-27	B-26
2.1.3 Finding an Exponential Model .....	A-28	B-27
2.1.4 Finding a Logistic Model .....	A-29	B-28
2.1.5 Recalling Model Parameters .....	A-30	B-30
2.1.6 Random Numbers .....	A-31	B-30
2.2.1 Replay of Previous Entries to Find Formula Outputs .....	A-32	B-31
2.2.2 Determining Future Value .....	A-33	B-32
2.2.3 Finding Present Value .....	A-33	B-32
2.3.1 Finding Second Differences .....	A-34	B-33
2.3.2 Finding a Quadratic Model .....	A-35	B-33

2.3.3	Finding a Cubic Model .....	A-35	B-34
<b>3</b>	<b>DESCRIBING CHANGE: RATES</b>		
3.1.1	Finding Average Rates of Change .....	A-37	B-35
3.3.1	Magnifying a Portion of a Graph .....	A-38	B-36
3.3.2	Drawing a Tangent Line .....	A-39	B-37
3.5.1	Calculating Percentage Change .....	A-42	B-40
3.5.2	Calculating Percentage Rate of Change .....	A-42	B-41
<b>4</b>	<b>DETERMINING CHANGE: DERIVATIVES</b>		
4.1.1	Numerically Investigating Slopes on the Home Screen .....	A-43	B-42
4.1.2	Numerically Investigating Slopes Using the Table .....	A-44	B-44
4.1.3	Visualizing the Limiting Process (optional) .....	A-45	B-44
4.3.1	Understanding Your Calculator's Slope Function .....	A-46	B-46
4.3.2	Derivative Notation and Calculator Notation .....	A-49	B-49
4.3.3	Drawing Tangent Lines From the Graphics Screen .....	A-50	B-50
4.3.4	Calculating $dy/dx$ at Specific Input Values .....	A-51	B-51
4.4.1	Numerically Checking Slope Formulas .....	A-52	B-52
4.4.2	Graphically Checking Slope Formulas .....	A-53	B-53
<b>5</b>	<b>ANALYZING CHANGE: EXTREMA AND POINTS OF INFLECTION</b>		
5.1.1	Finding $x$ -Intercepts of Slope Graphs .....	A-55	B-55
5.1.2	Finding Optimal Points .....	A-57	B-56
5.2.1	Finding $x$ -Intercepts of a Second Derivative Graph .....	A-59	B-58
5.2.2	Finding Inflection Points With Your Calculator .....	A-61	B-60
<b>6</b>	<b>ACCUMULATING CHANGE: LIMITS OF SUMS AND THE DEFINITE INTEGRAL</b>		
6.1.1	Approximations With Left Rectangles .....	A-62	B-62
6.1.2	Approximations With Right Rectangles .....	A-63	B-63
6.2.1	Simplifying Area Approximations .....	A-65	B-66
6.3.1	Limits of Sums .....	A-66	B-67
6.5.1	The Fundamental Theorem of Calculus .....	A-68	B-69
6.5.2	Drawing Antiderivative Graphs .....	A-68	B-69
6.6.1	Evaluating a Definite Integral on the Home Screen .....	A-69	B-70
6.6.2	Evaluating a Definite Integral From the Graphics Screen .....	A-70	B-71
<b>7</b>	<b>ANALYZING ACCUMULATED CHANGE: MORE APPLICATIONS OF INTEGRALS</b>		
7.1.1	Finding the Area Between Two Curves .....	A-72	B-73
7.3.1	Future Value of a Discrete Income Stream .....	A-73	B-74
7.4.1	Consumers' Surplus .....	A-75	B-75
7.4.2	Producers' Surplus .....	A-76	B-77
7.5.1	Average Value of a Function .....	A-77	B-77
7.5.2	Geometric Interpretation of Average Value .....	A-78	B-78
7.6.1	Normal Probabilities .....	A-79	B-79
<b>8</b>	<b>REPETITIVE CHANGE: CYCLES AND TRIGONOMETRY</b>		
8.1.1	Converting Angles From Radians to Degrees .....	A-80	B-80
8.1.2	Converting Angles From Degrees to Radians .....	A-80	B-80
8.1.3	Evaluating Trigonometric Functions .....	A-81	B-81
8.2.1	Fitting a Sine Model to Data .....	A-82	B-82
8.3.1	Derivatives of Sine and Cosine Models .....	A-83	B-83
8.5.1	Integrals of Sine and Cosine Models .....	A-84	B-84

<b>9</b>	<b>INGREDIENTS OF MULTIVARIABLE CHANGE: MODELS, RATES, GRAPHS</b>		
9.1.1	Finding Cross-Sectional Models (holding the first input variable constant) . . . . .	A-85	B-85
9.1.2	Finding Cross-Sectional Models (holding the second input variable constant) . . . . .	A-86	B-86
9.1.3	Evaluating Outputs of Multivariable Functions . . . . .	A-86	B-86
9.2.1	Sketching Contour Curves . . . . .	A-88	B-88
9.3.1	Numerically Checking Partial Derivative Formulas . . . . .	A-89	B-89
9.3.2	Visualizing and Estimating Partial Rates of Change . . . . .	A-91	B-90
9.3.3	Finding Partial Rates of Change Using Cross-Sectional Models . .	A-92	B-91
9.4.1	Evaluating Partial Derivatives of Multivariable Functions . . . . .	A-93	B-92
9.4.2	Compensating for Change . . . . .	A-94	B-93
<b>10</b>	<b>ANALYZING MULTIVARIABLE CHANGE: OPTIMIZATION</b>		
10.2.1	Finding Critical Points . . . . .	A-95	B-94
10.2.2	The Determinant Test . . . . .	A-96	B-95
10.3.1	Classifying Optimal Points Under Constrained Optimization . .	A-97	B-97
<b>11</b>	<b>DYNAMICS OF CHANGE: DIFFERENTIAL EQUATIONS AND PROPORTIONALITY</b>		
11.1.1	Euler's Method for $dy/dx = g(x)$ . . . . .	A-99	B-98
11.1.2	Euler's Method for $dy/dx = h(x, y)$ . . . . .	A-100	B-99
<b>APPENDIX</b>	. . . . .	<b>A-101</b>	<b>B-100</b>
